Haven't looked at the data closely yet, but perhaps we can find a way to use this and/or find out how to get this type of data each year from EIA.

Jeff

**Subject:** NODA Discussion - Oil and Gas Projections

Norm and Jeff,

I checked with John Grant at Ramboll Environ regarding the question of future projections for oil and gas basins. John got the attached tables from John Staub at EIA regarding shale play projections. Rows 112 and 162 are the start of the tight oil and shale gas plays, respectively. Apparently these tables are not posted on the EIA website but EIA can provide them.

Brian Keaveny at EPA (not sure what group he works in) was also mentioned as a contact for play/basin data.

I hope this is helpful. Let us know if you have any questions.

Regards,

Cathe

**Subject:** Thanks - NODA Discussion

Norm and Alison,

Thanks for coordinating yesterday's call and for everyone's time to discuss various aspects of the NODA and the modeling platform review process. The clarifications regarding some of our comments were helpful and we appreciate your offer to follow-up on the outstanding questions from the call. I also have my action item regarding EIA data and will circle back with Jeff.

Regards,

Cathe
